17 PARTNERSHIPS FOR THE GOALS

# Challenges facing the financial industry with regards to the EU Taxonomy

100% coverage ensuring full regulatory compliance and eliminating the need of multiple data providers or any internal processes.

Complexity of EU Taxonomy compliance in an evolving regulatory context

Difficulty accessing up-to-date, traceable data on listed and private equity

EU Taxonomy Solution details

✓ **Full transparency** with click-to-source

✓ Regulation fit: the solution will evolve on Jan 2024 as issuers start reporting on **alignment with the other "taxo4" objectives** (water, circular economy, pollution prevention, biodiversity)

✓ Excel, PDF and-or API EU Taxonomy Data access

EU Taxonomy Solution : one solution to comply with the regulation

Portfolio coverage : largest database on the market. We offer EU Taxonomy data on both listed issuers as well as on private companies or government related entities.

Customized Data Delivery : our unique feature allows us to provide data in accordance with your template and any other technical or analytical requirements. Seamless integration of impak's data into your existing data lake, established API endpoints, pre-prepared Excel spreadsheets, PDFs, and our web platform.

Swift Delivery : experience the fastest delivery speed in the market, with an average turnaround time of 24 hours from the order / disclosure to data feed.

EU Taxonomy Solution : one solution to comply with the regulation

Superior Quality Estimates : Data for non-reporting issuers will be provided either through proxy calculations or via web-based questionnaires. Our proxies are based on the most up-to-date database of EU Taxonomy data disclosed by reporting companies.

Enhanced Data Validation and Audit : Whether you work in Excel, use our API, or read PDFs, each and every data point is easily traceable to its source. With just a single click, you can validate and audit data by instantly accessing the precise location within the original company report, all in your usual web browser.

EU Taxonomy Solution : one solution to comply with the regulation

EU Taxonomy Solution includes an automated impak Data Collection Platform (iDCP) - dedicated to private companies

EU Taxo for private companies : use our collection data platform

EU Taxonomy Solution includes an automated impak Data Collection Platform (iDCP) - dedicated to private companies
