

Responsible Procurement Policy - impak Analytics

Responsible Procurement Policy

About

impak Analytics is a Canadian and French start-up that has built impak IS², an impact assessment and scoring solution based on leading international standards, notably the Impact Management Project and the United Nations 17 Sustainable Development Goals.

Scope

This policy applies to all procurement activities undertaken by the Company and to all impak employees, suppliers and contractors under impak's operational control.

Our commitment

impak Analytics is committed to purchasing goods and services that minimise negative and enhance positive impacts on the environment and society whilst meeting its business requirements. These principles seek to ensure that we and our suppliers act in a responsible manner. We intend to make our operations more sustainable by:

- Complying and adhering to all the applicable environmental, social and ethical laws in respective countries and jurisdiction;
- Identifying environmental, social and ethical risks associated to goods and services, as well as of suppliers, before purchasing;
- Prioritizing the purchase of goods and services from suppliers that best minimise their negative impacts and enhance positive impacts on the environment and society;
- Communicating this policy to all staff, contractors and suppliers, and disclosing it to the public.

We will regularly review and refine our Responsible Procurement Policy to ensure it remains current and relevant.
